

Nature Works - staklena filterska ispuna proizvedena uz pomoć visoke tehnologije

- Nature Works - Viskokokvalitetna staklena filterska ispuna Filterski medij na bazi stakla razvila je grupacija "Camacho Group" uz pomoć MC2 tehnologije.
- Nature Works koristi se kao zamjena klasičnoj silikatnoj pješčanoj filterskoj ispuni.
- Samo Nature Works daje 10 godišnju garanciju za kvalitetu.

- *Nature Works Hi-Tech GLASS FILTER MEDIA is a glass-based filter media developed by the Camacho Group with MC2® technology*
- *Nature Works is used to replace the conventional filter media, such as silica ispuni.*
- *Only Nature Works offers a 10-year Quality Guarantee*

Staklena filterska ispuna razvijena uz pomoć visoke tehnologije

Hi-Tech Glass Filter Media

100% unknown particles free

Low quality sample

*Separate Verunreinigungen aus einer Probe

Nature Works prednosti

Nature Works Benefits

Ušteda

Savings

Ušteda vode

Water saving

Ušteda energije

Energy saving

Ušteda na kemikalijama

Chemicals saving

Učinkovitija filtracija, smanjuje utjecaj na okoliš

Depuration is more efficient,
reducing enviromental impact

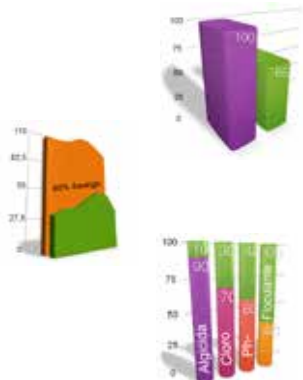

Nature Works Visoko-kvalitetan filtracijski medij ne stvara biofilm

Nature Works Hi-Tech Filter Media
does not create biofilm

Visoka tehnologija protiv zbijanja

High Anti Compaction Technology

Nedostaci klasičnog medija

- ❌ ograničen vijek trajanja
- ❌ Velika potrošnja kemikalija, vode i energije
- ❌ Higijenski upitan zbog stvaranja biofilma
- ❌ stvaranje pukotina i kanala u mediju što smanjuje kvalitetu filtriranja
- ❌ nije ekološki. Uz veliku potrošnju, na kraju vijeka trajanja postaje problematičan otpad..

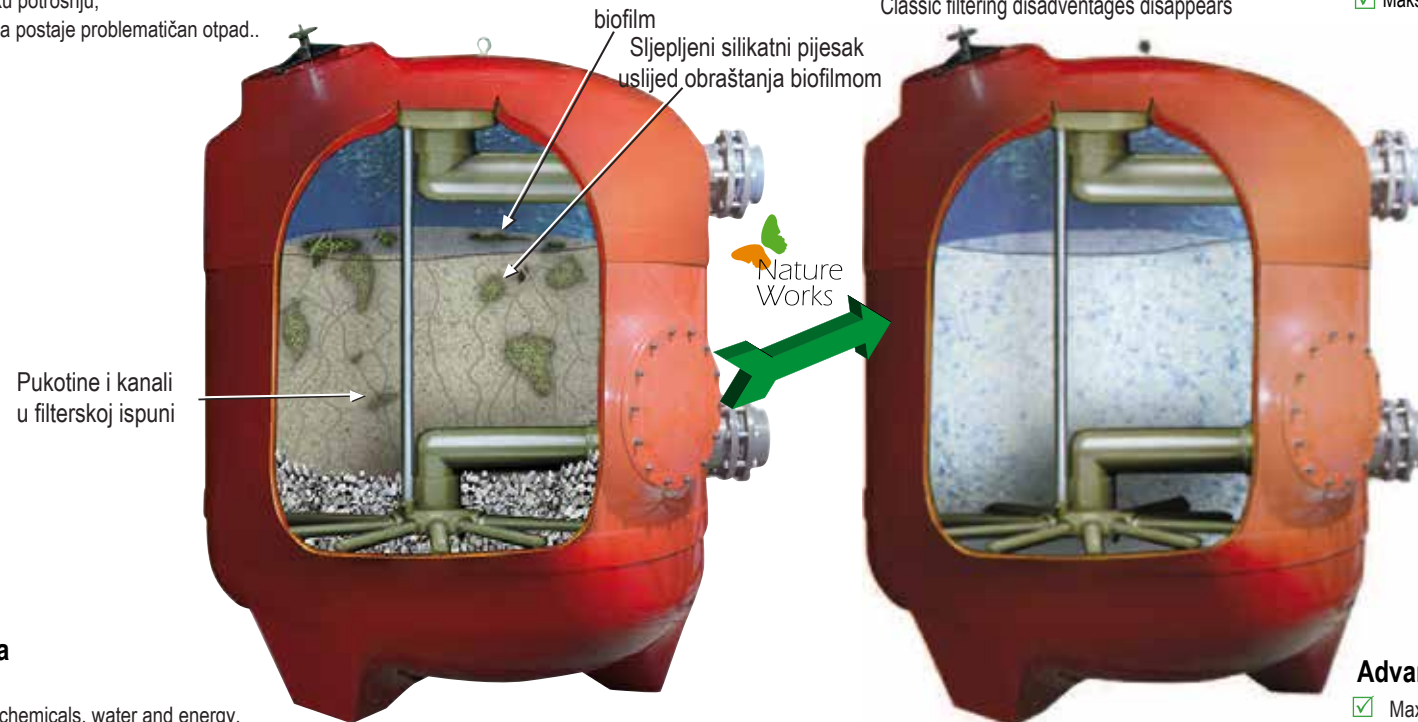

Disadvantages of the classical media

- ❌ Limited lifespan.
- ❌ High consumption of chemicals, water and energy.
- ❌ Poor hygiene due to biofilm generation.
- ❌ Groove creation that reduces the filtering quality.
- ❌ Non-environmentally friendly. Besides their high consumption, by the end of their lifespan they become polluting waste.

Kako funkcionira Nature Works?

How does Nature Works operate?

Klasični nedostaci filtracije nestaju
Classic filtering disadvantages disappears

Presjek kroz standardnu pješčanu ispunu.

Standard filter system Outline

Prednosti Nature Worksa

- ✓ Dugi vijek trajanja
- ✓ Minimalna potrošnja kemikalija, vode i energije.
- ✓ Vrhunska kvaliteta filtracije.
- ✓ Neznatan pad tlaka
- ✓ Maksimalno higijenski. Antiseptik koji ne stvara biofilm.

Jedna granulacija za sve
dimenzije filtera.
Za višekratnu upotrebu
(nakon servisiranja filtera)

Same kind of grain
to any filter size
REUSABLE
(after repairing filter)

Advantajes of Nature Works

- ✓ Maximum lifespan.
- ✓ Minimum consumption of chemicals, water and energy.
- ✓ Ideal filtering quality.
- ✓ Preassure loss is practically negligible.
- ✓ Maximum hygiene. It is an antiseptic that does not generate biofilm. It avoids matting.
